

Fold and Play Acela Engine

1. Print this PDF. Normal printer paper will work, but the train will fold together best when printed on heavy paper or cardstock.
2. Ask an adult to help cut along all the solid PINK lines. Make sure to carefully cut around the wheels and the slots marked A, B and C.
3. Fold down on all the dashed GREEN lines, away from printed side. Make sure the wheels separate from the bottom.
4. Insert tabs A, B and C into their corresponding slots.
5. Close front and back of train.
